

ADVANCED WOUND HEALING SOLUTIONS

Now Chronic Wounds Granulate Faster

"Solutions that truly help resolve challenges in **WOUND HEALING**"

SEESKIN TECHNOLOGY

An Innovative Solution to Regenerate(SEE) SKIN

SEESKIN is an innovative nanotechnology based wound dressings containing bio-engineered Type I collagen and chitosan through a latest patented technology, which delivers unmatched yet consistent healing to non-healing ulcers. SEESKIN is an outcome of committed efforts from a team of leading scientists and eminent surgeons having several decades of experience on working with collagen.

MANAGEMENT

SEESKIN PLUS COLLAGEN SPONGE

PACK	UNITS/BOX
5 × 5 CM	10
10 × 10 CM	5

- Designed to Promote faster Regeneration
- Porous form facilitates oxygen transfer for wound healing
- Maintains a physiological moist environment for healing
- 100 % bioabsorbable, offers painless dressing change
- Easy to apply and enhanced patient comfort

INDICATION

Managing acute and chronic wounds with light to heavy drainage

IDEAL FOR
BURNS AND
DONOR SITES

SEESKIN ULTRATHIN COLLAGEN POROUS SHEET

PACK	UNITS/BOX
5 × 5 CM	10
10 × 10 CM	10
10 × 20 CM	1

- Primary wound dressing for all drainage types
- Micro-porous, soft, absorbent, and conformable wound dressing
- Maintaining a physiologically moist microenvironment that is conducive for the formation of granulation tissue

INDICATIONS

SEESKIN ULTRATHIN offers wider coverage for chronic wounds

- Partial Thickness Burns
- Donor Sites Dehiscd
- Surgical Wounds
- Trauma Wounds
- Post-Operative Wounds

IDEAL FOR
DEEP
WOUNDS

SEESKIN P COLLAGEN PARTICLES

PACK	UNITS/BOX
5 mL	10
10 mL	10

- Promotes granulation in deep wounds for early grafting
- Easy to apply and more efficient wound coverage on the irregular wound surface
- Maintains a physiological moist environment for healing
- 100 % bioabsorbable, Offers painless dressing change

INDICATION

For undermined/deep cavity and irregular surface wounds

IDEAL FOR
INFECTED
WOUNDS

SEESKIN AB MEDICATED COLLAGEN PARTICLES

PACK	UNITS/BOX
5 mL	10
10 mL	5

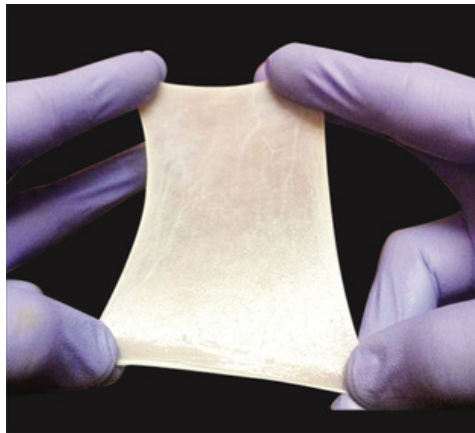

- Type I Collagen Particles with Mupirocin IP 2 % w/w and Metronidazole IP 1 % w/w
- Acting as a synergistic combination for promoting granulation in a deep infected wound.
- Topical Mupirocin is very effective against S.aureaus and a wide range of Gram +ve bacterial infections.
- Metronidazole topical is indicated for the treatment of Gram -ve bacterial infections.

INDICATION

Effective against infected chronic wounds

BURN THERAPY

COLLDREZ WET COLLAGEN SHEETS

PACK	UNITS/BOX
5 × 5 CM	4
10 × 10 CM	4
10 × 25 CM	4
15 × 30 CM	4
20 × 40 CM	4

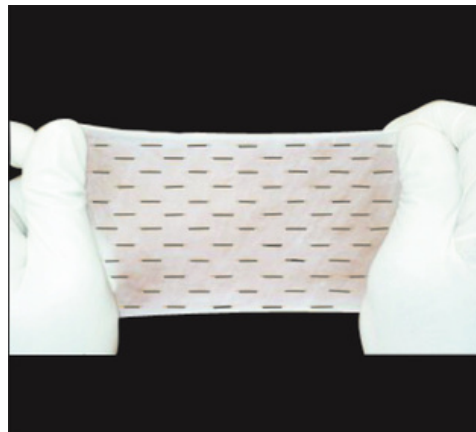

- Ideal for Superficial & Partial Thickness non-infected Burns
- Temporary wound cover in major open fracture wound
- Beyond acceleration of the treatment, it also helps to prevent hypertrophic scars

INDICATIONS

- Second degree superficial and deep dermal burns
- 3rd degree burns as a temporary cover after Escharectomy / Tangential excision
- Temporary wound cover in major open fracture wound
- Shallow pressure sores

EXUDATION WOUNDS

COLLDREZ M COLLAGEN MESHED SHEETS

PACK	UNITS/BOX
5 × 5 CM	4
10 × 10 CM	4
10 × 25 CM	4
15 × 30 CM	4
20 × 40 CM	4

- Sterile Wet Collagen Sheet in Meshed Form. Ideal for Exudation/ Infected Burns and Wounds to facilitate easy drainage of fluids

INDICATIONS

- Usage On Exuding/ Infected Burns and Wounds for Easy Drainage of the Fluid
- Skin donor Sites
- Superficial & deep dermal burns.
- For 3rd Degree burns as a temporary cover.
- Traumatic loss of skin cover.

EPIDERMAL
FORMATION

COLLDREZ D DRY COLLAGEN SHEETS

PACK	UNITS/BOX
5 × 5 CM	10
10 × 10 CM	10
10 × 20 CM	1
20 × 20 CM	1

- COLLDREZ D is a sterile, translucent, flexible dressing, designed to heal partial thickness burns, bedsores, and skin transplants.
- Beyond acceleration of the treatment, it also helps to prevent hypertrophic scars
- COLLDREZ D acts as a supporting scaffold for skin epidermal layer formation
- Easy adhesive on the wound surface

INDICATION

A specialized dressing for promoting skin epidermal formation

IDEAL FOR
BURN
WOUNDS
AND
INFECTION
CONTROL

COLLAMATRIX Ag NANO SILVER COLLAGEN GEL

PACK	UNITS/PACK
15 G	1

- Antimicrobial silver helps manage Wound Bioburden
- Type I Collagen promotes granulation and facilitate faster healing

INDICATIONS

- First and Second Degree burns
- Pressure ulcers (Stages I to IV)
- Venous stasis ulcers Superficial
- scrapes
- Radiotherapy Burns

PROMOTE
AUTOLYTIC
DEBRIDEMENT

SYNERHEAL COLLAGEN HYDROGEL

- Promotes autolytic debridement
- Rehydrates dry wounds and eschar
- Maintaining moist healing environment
- Soothes and reduces pain
- Clear gel allows wound visibility

INDICATIONS

- Pressure ulcers (Stages I to IV)
- Venous stasis ulcers
- Superficial scrapes
- First and Second Degree burns

PACK	UNITS/PACK
30 G	10

BEDSORES &
POST
RADIATION
BURNS

COLLAMYCIN GENTAMYCIN COLLAGEN HYDROGEL

- Type-1 collagen Hydrogel with antimicrobial Gentamicin Sulphate IP 0.1 % w/w
- Gentamicin Sulphate is a wide spectrum antibiotic that provides highly effective topical treatment in primary and secondary bacterial infections of the skin

INDICATIONS

- Bed Sores
- Pressure Ulcers (Stages I to IV)
- Venous stasis ulcers
- Superficial scrapes
- Second Degree burns
- Post Radiation burns

PACK	UNITS/PACK
15 G	10

PAINLESS
WOUND
DEBRIDEMENT

SYNERZYME PAPAIN UREA DEBRIDEMENT OINTMENT

PACK	UNITS/PACK
15 G	10

- Papain-urea ointment is a debriding agent. It works by helping the breakdown of dead skin and pus, which helps improve the recovery time of open wounds
- SYNERZYME Ointment is used to remove dead tissue and thinning the pus in lesions such as ulcers, burns, bed sores, surgical wounds, cysts, and carbuncles

INFECTION
CONTROL

SYNEBACT MUPIROCIN OINTMENT

PACK	UNITS/PACK
5 G	50

To treat infections caused by bacteria called Methicillin-resistant Staphylococcus aureus (MRSA)

- Eczema
- Dermatitis
- Psoriasis
- Herpes (cold sores)
- Infected cuts,
- Skin sores, and insect bites

SCAR MANAGEMENT

ADVANCED SILICONE SCAR GEL / SILICONE SHEET

SCAR FIX - GEL

Scar Fix gel is designed & developed using a novel patented, surfactant-free, silicone emulsion technology (CareSil®) - Made in USA. Delivers unmatched results.

SYNERSil - SHEET

- Silicone Gel / Sheet can be used on the scars immediately after the wound heals.
- Do not use on open wounds or when any dermatological conditions disrupt the skin such as rash and/or burns.
- Silicone Gel / Sheet should not be applied over other skin treatments without the advice of your doctor.

keloid scar

Burn scar

Hypertrophic scar

ACNE scar

ENBOND - STERILE BIO-ADHESIVE

STERILE BIO-ADHESIVE SUITABLE FOR ADHESION OF SKIN

Enbond - Sterile Bio-Adhesive leads to significantly better wound closure because of the polymeric film binds the edges strongly and seals the wound precisely.

INDICATIONS

Closure of

- External surgical and post-traumatic wounds, Incisional wounds, Gynaec & Obstetric external incisional wounds
- Plastic and Cosmetic surgery including all facial surgeries.

PACK	UNITS/BOX
0.25 ml	1
